

TeamConnect® Security

Protect your organization against threats to your brand equity.

Strategically manage intelligence, investigate incidents, gather evidence, and collaborate with law enforcement. TeamConnect is the security operating system that helps you protect your organization's brand, IP, market value, and revenues.

Using a single point of surveillance, TeamConnect Corporate Security allows you to manage security risks across the enterprise to safeguard corporate assets. With greater visibility and control, you can manage incidents from initial creation to investigation and closure. TeamConnect Corporate Security helps you strengthen your security operations and improve business value through losses avoided and recoveries made.

Safeguard vulnerable assets with improved visibility

Gain a holistic view of security threats and incidents across the enterprise. Dashboards and reports provide complete visibility into high-risk exposures and improve strategic decision-making. TeamConnect helps you plan responses, allocate resources, and investigate:

- ▶ **Product Integrity:** Counterfeiting, Product Diversion
- ▶ **Supply Chain Security:** Product Loss, Interruption, and Down-time
- ▶ **Property Security:** Arson, Site Damage/Destruction, Physical Intrusion, Theft, Terrorism
- ▶ **Information Security:** Data Theft, Unauthorized Network Access, Virus Attacks
- ▶ **Personnel Security:** Accidents, Threats, Workplace Violence, Kidnapping, Inappropriate Business Conduct, Kidnapping
- ▶ **Fraud & Forgery:** Expense Account Fraud, Identity Fraud
- ▶ **Threat/Risk Assessment:** Alerts, Notifications, Investigations

A leading pharmaceutical company with global operations, 40,000 incidents reported annually, 200 security staff, and 40 investigators.

The Pharmaceutical Challenge

- ▶ IP vulnerable to threat and counterfeiting.
- ▶ Counterfeit products threaten sales, market share, business continuity, and consumer confidence.
- ▶ Global scale of operations complicates tracking security threats, monitoring risk and exposure.
- ▶ Organization lacks a holistic view of security across the enterprise.

TeamConnect Helps Safeguard IP

Using TeamConnect Corporate Security, the pharmaceutical giant successfully locates a drug counterfeiter in China.

- ▶ Monitoring exposure and security breaches allow the organization to locate the counterfeiter in China.
- ▶ Detailed report generated and handed over to the Chinese police, outlining IP infringement.
- ▶ 12 people arrested and nearly half a million counterfeit pills seized.
- ▶ Corporate Security system allows the organization to protect product integrity, enforce patents, and ensure consumer confidence.
- ▶ Sales and revenues safeguarded.

Ensure optimal performance

Eliminate miscommunications and duplicative work using TeamConnect's centralized repository. TeamConnect unifies your security efforts and significantly reduces the time and cost associated with managing incidents. Automated security enforcement helps you:

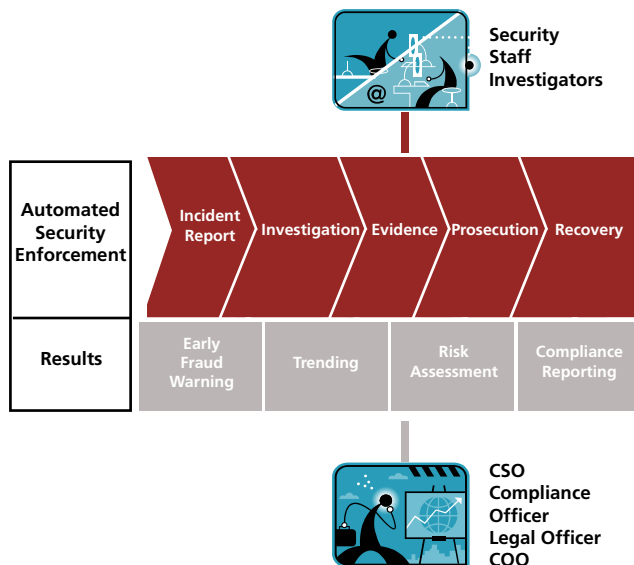

- ▶ Log incidents
- ▶ Investigate threats
- ▶ Collect and manage evidence
- ▶ Collaborate with law enforcement
- ▶ Prosecute
- ▶ Recover losses

Collaborate with business partners

Share critical information with internal departments and business partners throughout the incident lifecycle. TeamConnect allows you to partner with external organizations such as insurance, forensic labs, outside counsel, and enforcement to improve efficiency and communication.

Integrate your existing applications

Link all your applications into a single point of control. TeamConnect enables seamless inter-operability with external applications and legacy systems through XML's open standards. Integrate with departmental systems and partner compliance point solutions.

TeamConnect Corporate Security allows security staff and investigators to automate enforcement processes and deliver critical reports to management.
